

Biltema Foundation (Netherlands) activities

The Foundation attempts to combine large scale projects with smaller projects and at the same time to keep funds available for disaster funds. There have been extensive contacts with Médecins Sans Frontières and Save the Children in respect of their requirements in this respect.

Finding projects of a suitable quality is extremely important. When necessary or useful the Foundation cooperates with other organisations.

Projects which are currently ongoing include:

- the Scandinavian Children's Mission which has an orphanage in the Philippines
- the Women's Charity Association, which provides refuges for children in Vietnam

Biltema Foundation has also been cooperating with Biltema Foundation Switzerland with a view to donations to a number of charities including:

- Save the Children Sweden: Helping children worldwide.
- Kids Operating Room: Building and equipping operation rooms for children. The goal of creating a world where every child has equal access to safe surgery worldwide.
- Elephant Family: Supporting Asian elephants in Asia.
- Just for Smiles: Helping handicapped children and young adults in Switzerland
- Humanimal Trust: Medical research for humans and animals in the United Kingdom.
- Fondation Théodora: Contribute to the wellbeing of children in hospitals, hospices and specialist care centres by providing visits from professional performers who have been trained to work in a medical environment in Switzerland.
- ISREC: Supporting experimental cancer research in Switzerland.
